General Remarks

There is a Great variety in this Township The heads of the
Small Streams empty in the Raccoon near the dividing.
Ridge Good soil and Pt. rate. as is also the bottoms

T. N. 15 R. N. 7-11 2nd M. Ind.

near the Creek. The hills are high and steep and in some places cliffs of considerable height.

As you recede from the Creek. They become lower they are generally well watered.

The Creek here is a considerable stream and affords water for some mills but the bed is generally a Bank of sand. So that it will be difficult to build dams to stand, as it rises to a great height and is rapid &c.
